

## Winding Down

She was everything to him. She just wasn't what he thought.

### Blurb

It wasn't the end of the world I feared. It was losing her.

When a catastrophic solar flare wipes out all communication and power in a single event, society collapses overnight. As the world fractures, Adam watches his wife, Zoe, slip into long, unresponsive shutdowns, something far more terrifying than the chaos outside.

Then Adam discovers the truth about Zoe.

With no power and no time left, Adam must carry her across a lawless America to a remote facility in upstate New York before he loses her forever. But the further he travels, the more the world unravels, and the more impossible his choice becomes. Because saving Zoe may mean losing everything else.

In a world that's already ended, what would you sacrifice to keep love alive?

*Winding Down* is a relentless, darkly funny, gut-punching thriller about survival, betrayal, and what it means to love someone.
