

## Dark Medicine In A Corrupt World

### Blurb

Seventy-five-year-old Denise Mulder is painfully lonely. A DNA test is her last hope of finding family. In six to eight weeks she'll know if she's related to anyone, or if she'll die without ancestors.

She longs for family connection. After fifty years of marriage, she thinks she's a childless widow. But a doctor's dark secret reveals something she never expected, she has a forty-year-old son she never knew existed.

Denise is teaming up with her new-found son to uncover what the doctor has been hiding for the past forty years. But with the doctor one step ahead of her every move, she fears dying before she can get to know her only child.

With her dream of being a mother on the line, Denise is determined to expose the doctor's secret before he silences her forever.

Dark Medicine In A Corrupt World is a chilling sci-fi horror novel. If you like medical conspiracies, sinister experiments, and creeping dread, you'll love this gripping sci-fi horror mystery.
