

In The Margins of Light

Poems Of Seeing, Waiting And What We Miss

Blurb

In the Margins of Light is a quiet, powerful collection of poems that invites you to slow down and truly see the world around you. In a time filled with noise, urgency, and distraction, this book turns your attention to what often goes unnoticed, the subtle shifts between seasons, the weight of waiting, the quiet strength of love, and the fleeting moments that shape a life.

Across six thoughtfully crafted sections, Peter Farhall explores:

The struggle and beauty of finding your voice

The art of observing the world with patience and clarity

The devotion behind creative work and the artist's journey

The depth of family, memory, and love

The raw reality of life's most transformative moments

The search for meaning, truth, and legacy

These poems do not rush. They do not shout. Instead, they linger. From the silent emergence of spring in *The Unwitnessed Threshold* to the deeply personal reflections in *An Ode to Mum*, and the striking intensity of *Becoming*, each piece carries a quiet emotional weight that stays with you long after reading.

This is not a book that tells you what to think. It is a book that changes how you notice.

If you've ever felt that the most important parts of life happen in the background, unseen and unspoken, this collection will feel like it was written for you.

Take your time with it.

Because this book was meant to be experienced slowly.
